

FOR SALE - Volvo 1998 S70 T5s

I have three 1998 S70 T5s to sell. I bought these years ago so my kids and I would have great cars to drive and they served us very well. Time for a new home for all of them. They all run, are all bone stock, are clean, licensed and insured. One is a Borton car. Can be sold individually or as a lot. PRICE is flexible, look up their value and make an offer. You will appreciate the condition of these cars if you have time to visit. I also have lots of spares available.

A few details follow and I can certainly provide more info. Contact info below, call or write anytime.

- All titles are free and clear, average mileage is around 160,000
- All are drivable now, no driveline issues, each has some things to fix, can identify
- No real body damage, some little nicks and small dents of course, when clean they look almost new
- All are bone stock, none have been modified in any way except all have strut tower bars installed
- Two have black interiors, one is beige, not clear if anyone ever sat in the back seats, all have original mats, spare tire, books
- Two have automatic transmissions, one is a 5-speed manual which happens to be a special T5 SE model
- All have two sets of Michelin tires, one set all-season and one set ice/snow, all on Volvo OEM rims, all with good tread
- Spare Parts – As an aside, I also have many, many boxes of spares, buy a car, get free spares you need
