New features and enhancements are on their way — straight to your car.

Robert, we are delighted to announce that the latest Volvo Cars software for your XC60 Recharge is now available, and that the update will soon be delivered to your vehicle over-the-air.

This software update contains key feature enhancements and bug fixes to make your XC60 Recharge even better, including access to the SiriusXM application, allowing you to start enjoying your complimentary 3-month trial in the car.

The best part? This update will be sent directly to your car, so you can install the software on your own at your convenience. And of course, the update is free of charge. If you wish to have access to these updates today, please contact your retailer. Click [here](#) for complete software details.
